Written comments about this course and your instructor are encouraged. Please be assured that these forms will not be returned to your instructor until after grades are submitted.

What did you like most about this course and/or the instructor's teaching?

Jay consistently and uniformly provides a comprehensive understanding of the course material and field of computer science. I entered this course expecting a challenging, rewarding, and comprehensive experience - and I was not disappointed. This class is a proper capstone for the CS curriculum at UML - combining the mathematics, language understanding, algorithm analysis, and architecture implementation knowledge.

What about this course and/or the instructor's teaching needs change or improvement?

Nothing.

Additional comments:

I sincerely mean to say that if I could rate 6/5 for these evaluation questions, I would. Jay is a professor who does not "almost always" explain, show personal interest, or inspire interest well - he "always" does so. This is the best professor in the department - probably the college.

What did you like most about this course and/or the instructor's teaching?

The way Professor John teaches is Amazing. But more proper explanation about what he exactly requires from the students with respect to projects should be clearly conveyed in first class or second class.

What about this course and/or the instructor's teaching needs change or improvement?

He needs to explain people about / help them with projects (At least for people who are really interested in the course. And don't have a proper coding background) Try to help them.

What did you like most about this course and/or the instructor's teaching?

Jay is an exemplary professor, one of if not the very best at this school. He is clear and concise, he is efficient. He wants his students to learn and does not give them bullshit or busywork. I may have grown a couple of grey hairs by taking his class, but I really wish I could have taken more of them while I was here.

What about this course and/or the instructor's teaching needs change or improvement?

*Assumes a working understanding of Racket syntax to follow along and understand notes.
Maybe OPL should be a required course for this class?*

Additional comments:

It's a special class that has me thinking that I'm not doing well because I'm not a good enough student. Jay is an absolutely fantastic teacher.
