| addq | %t, %rax | // (+ z + t) | $\emptyset \leftarrow$ live-after | |

S-3]

instrs $i_0 \dots i_n$ or $\{0 \dots n\}$

$\text{LiveAfter}(k) = \emptyset$ if $k = n$

$\text{LiveBefore}(k+1)$ o.v.

$\text{LiveBefore}(k) = (\text{LiveAfter}(k) \setminus W(k)) \cup R(k)$

$W: \text{inst} \rightarrow \text{set}(\text{vars and reg})$ we ~~write~~

$R: \text{inst} \rightarrow \text{set}(\text{vars and reg})$ we read

$m: \text{arg} \Rightarrow \text{set}(\text{vars and reg})$

$W(\text{pop}, a) = M(a)$

$m \text{ o/r } = \{ \}$

$R(\text{pop}, a) = \emptyset$

$m \text{ r } = \{ \}$

$W(\text{push}, a) = \emptyset$

$R(\text{push}, a) = M(a)$

5-y/

$$w(\text{neg } a) = M(a)$$

$$R(\text{neg } a) = M(a)$$

$$w(\text{add } src, dst) = M(dst)$$

$$R(\text{add } src, dst) = M(src) \cup M(dst)$$

$$w(\text{mov } src, dst) = M(dst)$$

$$R(\text{mov } src, dst) = M(src)$$

$$\text{mov } !x, !z \quad \text{in } \text{add } w, y, z$$

$$w = \{z\} \quad R = \{x\}$$

$$\begin{aligned} & (\{w, y, z\} \setminus \{z\}) \cup \{x\} \\ &= \{x, y, w\} \end{aligned}$$

5-5 interference : When we need two vars at the same time

$V = \{\text{vars and regs}\}$ edges = I

$x \text{ I } y$ iff $\exists k. \text{LiveAfter}(k) \ni \{x, y\}$
 move-biasing = M

5-6)

Suppose inst_k is

(add s d)

$\forall v \in \text{LiveAfter}(k)$, we'll add (d, v) to I
except for $v = d$

(mov s d)

$\forall v \in \text{LiveAfter}(k)$, we'll add (d, v) to I
except for $v = d$ or $v = s$

If inst_k deals a ~~special~~ ^{register r} "special" then add

(r, r) to I for all $r \in \text{LiveAfter}(k)$

callg it treats caller-saved regs special and %rax
 $\hookrightarrow \text{rax}, \text{edx}, \text{ecx}, \text{esi}, \text{edi}, \text{r8} - \text{r11}$
