At the beginning there was lots of examples to help with homework.

What about this course and/or the instructor's teaching needs change or improvement?

From the midterm on everything became vague and all about proofs which became extremely difficult. Midterm basically required memorizing book which is impossible with 6 classes and work

Additional comments:

All problems in this course are probably just because Jay was picked last minute and first time teaching this course here

What did you like most about this course and/or the instructor's teaching?

Jay explains everything thouroughly and is very knowledgable about the subject.

What about this course and/or the instructor's teaching needs change or improvement?

The assessments could be made more frequent so that poor performance does not severely affect grade.

What did you like most about this course and/or the instructor's teaching?

Professor McCarthy understood and explained the machines well. Displayed in interest in our understanding of the various concepts.

What about this course and/or the instructor's teaching needs change or improvement?

I think that more review of questions that would appear on homework or exams is needed. Going into assignments, I felt like I had very little practical experience despite having taken notes on everything in class.

- Enthusatic (sp) is the word I would descibe the teacher.
- Super smart guy
- Lucky to have him ~~...~~

What about this course and/or the instructor's teaching needs change or improvement?

I think that this is just a tough class to understand everything but the class seems very difficult to understand at times.
I would ~~make~~ focus on the second class on making sure everyone understood the symbols A, ∀, ∈, Σ, ect. I was lost at first.
