What did you like most about this course and/or the instructor's teaching?

Prof McCarthy's enthusiasm and expertise made me look forward to every class. Every question he answered offhand with his own knowledge in a time where most professors read from notes.

What about this course and/or the instructor's teaching needs change or improvement?

For me more code examples - the λ -calc and logical work-throughs help me understand the concepts, but code helps me understand how to implement

→ starting the class (day 1) with a git intro, then requiring it would have been helpful
